Tile and Grout Cleaners and Maintenance Chemicals | Jon-Don

Product description. => KERANET (KERANET) is based on a special organic acid and has the same aggression to Zagreb amenity and efflorescence as much more strong acids (hydroelectric acid, sulfuric acid, etc.) but, in contrast, the pair KERANET (KERANET) -a are not toxic. Correctly used, KERANET (KERANET) does not cause damage to the inter-fusion fillers for ceramic tiles.

Mapei Keranet Liquido - Acid-Based Cleaner for Ceramic ...

An example of an acidic cleaner designed for cleaning tile and grout is Stonetech's Restore. A one gallon container will clean approximately 1000 sq/ft of tile and grout. Acidic cleaners are safe to use on ceramic and porcelain tiles but they should never be used on most types of stone tiles. Acidic cleaners will quickly etch the finish of most types of stone tiles especially calcite based tiles like marble, travertine and limestone.

Best Types of Tile and Grout Cleaning Products

Sulfamic acid is commonly used in household cleaners to remove limescale from metals and ceramics. It's also effective at dissolving hard water deposits and removing dried cement and mortar residue from concrete and masonry. Muriatic acid is a less pure form of hydrochloric acid.

Top 10 Acid Cleaners of 2019 | Video Review

Muriatic acid is the strongest acid-based cleaner available to the public and it must be handled with care. It can and will burn your skin as well as ruin most materials including metal, so it is sold in a specific type of plastic and should not be stored in anything else.
