Blue Point Manual Switch Machine

The Ultimate Manual Turnout ControlThe Blue Point Switch Machine is easy to install and is actuated by a simple push rod to your layout's fascia. The adjustable throw rod holds the switch points in positive contact with the running rails to prevent derailments. A DPDT snap-action toggle switch inside the compact plastic housing changes electrical connections to the turnout frog to prevent ...

Blue Point Switch Machine Turnout Controller

We've designed the Blue Point™ Turnout Control to operate turnouts in scales from N through O. The electrical contacts are double pole, double throw (DPDT) rated at 5 amps, so they have plenty of capacity to power a frog or just about anything else you'll want to drive. DPDT Switch Diagram The picture on the right has two diagrams.

Blue Point Manual Turnout Controller - PPW/A-Line/Arrow Hobby

Feed Blue Point control wire up through hole in layout and into throw bar hole in switch points. Then we first install one screw and snug it up, but not completely tight. This holds Blue Point in place so second screw can be installed easily. Trim masking tape off of each side of Blue Point so it will move when final adjustments are made. 11

Blue Point Installation Instructions - Part 1 (Turnout not ...

To assemble the switch you will need white glue, a modeling knife, fine sandpaper, #2 philips screwdriver, and about 15 minutes of time. (The first one may take you a bit longer.) The BullFrog is easy to mount under your layout with just two screws and will work with all scales from Z to O.

TORTOISE will draw 15-16 ma. at stall, so 30 switch machines can be powered by a single 9 or 12 volt, 500 ma. wall plug adapter (available from Radio Shack). Any type of DPDT switch (toggle, slide, etc.) can be used to switch the polarity. This system will have two wires running from the control panel to each TORTOISE. See Diagram 1 below. 2.

Blue Point Turnout Controller. When I was looking for switch machines for my N scale layout I had a few key points that were important to me. They had to be high quality, remotely operated, easy for anyone to use especially novice operators, and be able to route the power automatically to the frogs.
