Definition. Motivation is commonly defined as what explains why people or animals initiate, continue or terminate a certain behavior at a particular time. Motivational states come in various degrees of strength. The higher the degree, the more likely it is that the state has an influence on behavior. This is often linked to forces acting from within the agent that result in goal-directed ...

The theory of reasoned action (TRA or ToRA) aims to explain the relationship between attitudes and behaviors within human action. It is mainly used to predict how individuals will behave based on their pre-existing attitudes and behavioral intentions. An individual's decision to engage in a particular behavior is based on the outcomes the individual expects will come as a result of performing ...
