The Platform is public, online, and available for all researchers who want to test their brain models or to build the brain-inspired robots of the future. The team is creating a complete virtual mouse, with eyes, whiskers, skin, a brain, and a body, with bones and muscles that function like its natural counterpart.

Robots - Human Brain Project

For example, you might cite a test or measure that has an abbreviation and then provide its citation (for a common case, here is how to cite the DSM-5). If the spelled-out version of the term appears in the narrative for the first time, put the abbreviation and the author-date citation in parentheses after it, separated by a semicolon.
