Overpopulation is a global crisis because there will be a struggle for food in the near future if the world gets too populated. I believe that overpopulation is indeed a global crisis. This is because as the world gets more populated, the food supply must increase to support the newborns.

### Is overpopulation a global crisis? | Debate.org

Overpopulation isn't just population density (amount of people per landmass). Overpopulation applies much more so to the number of people in an area exceeding the resources and the carrying capacity of the environment necessary to sustain human activities. So much focus is placed on the rapid population growth in third world countries.

### Overpopulation: The Human Population Crisis

A more controversial definition of overpopulation, as advocated by Paul Ehrlich, is a situation where a population is in the process of depleting non-renewable resources. Under this definition, changes in lifestyle could cause an overpopulated area to no longer be overpopulated without any reduction in population, or vice versa.

### Human overpopulation - Wikipedia
