Enterococcus is a large genus of lactic acid bacteria of the phylum Firmicutes. Enterococci are gram-positive cocci that often occur in pairs or short chains, and are difficult to distinguish from streptococci on physical characteristics alone. Two species are common commensal organisms in the intestines of humans: *E. faecalis* (90-95%) and *E. faecium* (5-10%).

Enterococcus - Wikipedia

A Focus on ADHD: Children and Adults "I am very good at forgetting". . ."I get angry because I try so hard". . ."I get overwhelmed and can't ask for help"...are typical frustrated statements from individuals with attention deficit hyperactivity disorder (ADHD), according to psychologist Saline (2018).
